

Triad Estimated Savings Guide

See how Coloplast may be able to help you reach your goals by entering your hospital's system-wide information to calculate an estimated annual saving.*

Option 1: Triad on wet or irregular surfaces

On wet or irregular surfaces, wound dressings may not always stay in place. Frequent dressing replacements could lead to avoidable costs related to using extra dressings. Triad can be applied anywhere, it adheres to wet skin, and it keeps the wound covered.

Enter all highlighted fields to see your estimated annual savings.

Current Treatment	
Type of dressing currently used	
Price per unit	
Units per patient during a 3-day stay	
Cost per Patient (per 3 days)	

Using Triad Wound Dressing	
Type of dressing used	Triad
Price per tube (2.5 oz)	
One tube is often enough for a 3-day stay*	1
Cost per Patient (per 3 days)	

*Based on average size wounds.

Estimated Savings during 3-day stay

Per patient (\$)	
Per patient (%)	
Relevant patients per week	
Estimated savings per year	

Option 2: Triad on necrotic tissue

Triad creates a moist wound environment that facilitates autolytic debridement, where the body's own enzymes break down necrotic tissue. CMC allows Triad to absorb low to moderate levels of wound exudate or broken-down tissue.
